

SKR35

Automatic anti-break-in security entrance

FAAC
Simply automatic.

SKR 35

SKR35 automatic entrance with the same anti-break-in performance as a class RC3 security door

The **SKR35** automatic entrance has been designed and manufactured to guarantee the same level of protection as a security door, enabling the entrance of shops, supermarkets or jeweller's to be protected without the need to install external security roller shutters.

This innovative entrance answers the increasing demand from the banking sector for example, for control systems with features that combine the convenience of an automatic transparent sliding door with an additional anti-intrusion security system.

As well as the security aspect, the **SKR35** has been designed to be safe during use. In fact, the system includes monitored safety sensors required by European Standard **EN16005** and sophisticated systems that constantly detect and monitor the position of the doors and adjust their speed and force to below regulatory limits. Lastly, the innovative **Energy Saving** device that enables **FAAC** entrances to identify the actual direction of transit and to open only for the amount of time actually required, thereby avoiding an unnecessary waste of energy.

MAXIMUM SECURITY

A continuous floor-mounted guide at the bottom of the door and a special anti-tamper device prevents the leaves from being forced open.

EUROPEAN CERTIFICATION

The class **RC3** certification in accordance with European standard **EN 1627** guarantees a high level of security against break-in attempts, even by experienced thieves using equipment such as wedges, screwdrivers, bolt cutters or crowbars.

GUARANTEED protection and VISIBILITY

There is no visible barrier, so the glass entrance is transparent, attractive and ensures a high aesthetic standard. In addition, the use of Class **P5A** shatter-proof security glass ensures an incredible level of resistance.

Complete automatic door consisting of a strong self-supporting extruded aluminium frame.

Reinforced 35 mm thick aluminium alloy profiles are used to manufacture automatic fixed and sliding leaf entrances with a slide-in glass system.

Class P5A 44.6/12/33.2 shatter-proof security glass.

Pre-assembled system with perimeter frame, complete with self-supporting head section, lateral uprights and accessories.

Floor-embedded guide with continuous floor mounted shoe along the entire width of the sliding leaves.

Leaves and frame are anodized or painted with RAL colours.

Multiple point security locking system installed on the vertical uprights of the mobile leaves.

Coupling between mobile and fixed leaves with special aluminium profiles with anti-lifting system.

Heat and sound insulation through edge brushes.

MODELS

MODEL	SKR35 1	SKR35 1+1	SKR35 2	SKR35 2+2
Leaves	1 mobile	1 mobile and 1 semi-fixed	2 mobile	2 mobile and 2 semi-fixed
Wall recess width (mm)	1,900±2,400	1,900±2,400	2,200±3,800	2,200±3,800
Passage opening width (mm)	850±1,100	850±1,100	1,000±1,800	1,000±1,800
